

Justin Gilmore

Technical Writer

(208) 284-4406 | 1justingilmore@gmail.com | [GitHub Portfolio](#) | [LinkedIn profile](#)

Summary

Remote Technical Writer with over 13 years of experience documenting complex enterprise **B2B SaaS platforms** and data systems. Expert in authoring **installation procedures**, deployment guides, and release notes using **Docs-as-Code** workflows (Git, GitBook, Markdown). Proven **ability to rapidly master new technical domains**, specialized tools, and complex codebases with minimal supervision. Proven success collaborating with product managers, support engineers, and technical peers in **Agile sprint environments**.

Core Competencies & Technologies

Content Strategy & Authoring: Docs-as-Code, Information Architecture (IA), Documentation Audits, Data Quality Standards, Agile Scrum, Topic-based Authoring (DITA XML), SDLC, Content Conditionalization, Version Management, Translation Management, SEO

Documentation Types: Installation and Deployment Procedures, Release Notes, API References (Swagger/OpenAPI), Troubleshooting Guides, System Architecture Documentation, User Guides, Data Sheets, Technical Manuals, UI Labels and Tooltips, Internal Training Content

Collaboration: Product Managers, Support Engineers, Program Managers, Software Engineers, Hardware Engineers, Product Engineers, Network Engineers, Graphic Designers, Subject Matter Experts, Marketing Managers, UX Managers, Localization/Translators, Lawyers/Legal

Technical Skills

- **Methodologies:** Docs-as-Code, Agile Development, Information Architecture, Content Audits, Topic-based Authoring, SDLC
- **Languages & Markup:** Markdown, YAML, HTML, JSON, DITA XML, SPL
- **Tools:** GitBook, Git, GitHub, GitLab, MadCap Flare, Splunk, Postman, Swagger

Professional Experience

AI Content & Model Evaluation Specialist

Independent Contractor (Handshake.ai & Data Annotation) | USA, Remote | May 2025 - Present

- **Establish** and apply structured evaluation criteria to audit complex AI model outputs, ensuring rigorous **data quality**, technical accuracy, and precise **documentation standards**.
- **Evaluate LLM outputs** for logical consistency, tone, and alignment with user intent.
- **Audit and review** adversarial testing submissions from team members to verify strict adherence to **complex multi-step protocols**.

Technical Systems Consultant

Independent Contractor | USA | January 2025 - May 2026

- **Design modern systems** for private clients and manage the **integration** with existing vehicle infrastructure to enable off-grid capability.
- **Audit** manufacturer **manuals and schematics** to diagnose and repair failures in aging wiring, climate control units, and **electromechanical components**.
- **Analyze hardware specifications** to ensure component compatibility and manage the procurement of specialized electrical and mechanical systems.
- **Manage** system integrations to ensure all work adheres to **manufacturer specifications and safety standards**.

Technical Writer

Walmart.com | USA, Remote | May 2024 - January 2025 (Contract)

- **Orchestrated** the **documentation lifecycle** for a high-priority **global logistics program**, enabling international sellers to leverage streamlined shipping and cross-border import workflows.
- **Developed** a comprehensive suite of technical deliverables, including **conceptual overviews**, technical **enrollment guides**, and **task-based procedures** for complex pricing and booking engines.
- **Collaborated** across multi-functional teams (Product, Engineering, and Legal) to translate complex **business logic** and **compliance requirements** into **user-centric seller documentation**.
- **Streamlined** content delivery by implementing **standardized templates** and clear **information architecture**, reducing potential support overhead for the cross-border seller portal.

Technical Writer

Amazon Mechatronics | USA, Remote | March 2023 - February 2024 (Contract)

- **Architected & implemented** a centralized **project management wiki**, serving as the **single source of truth** for technical specifications and operational workflows for warehouse packaging automation.
- **Standardized** complex technical reporting and **content management procedures**, significantly improving the **findability** of **critical documentation** for internal engineering and sustainability stakeholders.
- **Transformed** technical progress data into structured, **user-centric wiki content**, enabling multi-functional teams to track **project goals** and **sustainability** milestones with precision.
- **Collaborated** with engineering teams to document high-scale **mechatronics systems**, focusing on the integration of **automation hardware** and **sustainable packaging** solutions.

Technical Writer

Kohler Co. | USA, Remote | March 2021 - January 2023 (Contract)

- **Authored** high-complexity installation and user documentation for enterprise-grade hardware, utilizing **CAD models**, engineering drawings, and **Bills of Materials (BOMs)** to ensure 100% technical accuracy.
- **Engineered content reuse** strategies across multiple product lines, significantly **reducing authoring time** and maintaining consistency throughout the global product catalog.
- **Transformed** 3D engineering data into clear, 2D **technical illustrations** and visualizations, bridging the gap between complex engineering specifications and **end-user requirements**.
- **Collaborated** with **Subject Matter Experts (SMEs)** and product engineers in a remote environment to validate **technical procedures** and **safety compliance** for high-volume product launches.

Technical Writer

Microsoft | USA, Remote | February 2020 - July 2020 (Contract)

- **Optimized** legacy product documentation by implementing **Search Engine Optimization (SEO)**

best practices, resulting in increased organic traffic and improved content discoverability.

- **Executed** comprehensive **content audits and documentation revisions** to support a major corporate **rebranding initiative**, ensuring 100% alignment with new **brand standards**.
- **Modernized** help content for **cloud-based SaaS platforms**, translating complex technical updates into clear, **actionable guidance** for end-users.

Technical Writer

Groupon | USA, Remote | January 2020 - February 2020 (Contract)

- **Evaluated & piloted** multiple **Content Management Systems (CMS)** to determine technical suitability for a high-traffic **API documentation portal**.
- **Engineered** the structural redesign of the **developer portal**, improving the **information architecture** to support scalable API reference content.
- **Authored & published** formal **documentation standards** and best practices for internal engineering teams, ensuring consistency across all **API-related technical content**.

Technical Writer

Hewlett Packard Enterprise (HPE) | USA, Remote | February 2013 - November 2019 (Contract)

- **Developed & delivered** customer-facing **Installation Guides, User Manuals**, and the [REST API reference](#) for **B2B enterprise infrastructure software** (HPE OneView), operating autonomously within a global **Agile Scrum** team.
- **Orchestrated** the end-to-end **documentation release pipeline**, managing **version control**, quality assurance, and localization for complex software deployments.
- **Authored & maintained** high-impact technical content, including **REST API reference guides**, web help, and installation manuals, ensuring technical accuracy for **DevOps and Infrastructure engineers**.
- **Collaborated** with Subject Matter Experts (SMEs) to translate **hardware specifications** and software capabilities into structured, **user-centric documentation**.
- **Managed** the **integration of documentation** into the primary code branch and coordinated with third-party agencies to ensure high-quality **localized content** for global markets.

Education

Boise State University

B.A. in English | Technical Communication | Graduated 2011
